**ON TREND**

**Ombré now Sombré**

The demand for dark roots and lighter ends started a few years back and featured quite a stark dark-to-light fade – making Sombré ("subtle ombré") a much more subtle take on the dip-dye trend. A Sombré look has lighter sections that start up a bit higher and the lower lengths have sections of dark colour for a more gradual transition.

**Style Tip:** No need for touch ups, this look is strictly a low-maintenance affair.

**Red Hot Hair**

Without any doubt, right now the strongest hair colour trend is red! Red-haired models have never been so much in demand! Red hair can suit anyone, from long to short hair, fair to dark skin, you just need the right shade of red for you! And as the red hair spectrum is so broad, there are so many shades you can choose from. Subtle browns with a hint of red, strawberry blonde or even Pillar Box Red!
